2814

DATE MAILED: 09/03/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/452,749

Applicant(s)

ZAGOSKIN, ALEXANDRE M.

Examiner

Douglas A Wille

Art Unit

2814

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 July 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 and 28-65 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-18, 28-65 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____ 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 52 - 64 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 52 - 55 refer to clockwise and counterclockwise circulating supercurrents. It is not understood based on the material presented where these supercurrents are circulating. Are these supercurrents in the superconducting island, or do they cross the JJ or are they in the bank of all of the above? What causes these supercurrents? Are they due to fluctuations? Are they due to a difference in phase between two superconductors separated by a JJ? If the latter how can there be a circulation across the JJ?

4. Claims 56 - 59 refer to a twice degenerate state. It is not understood what the twice degenerate state refers to. In view of the fact that the supercurrents are not defined, the degeneracy of the two circulations is not understood.

5. Claims 60 and 64 refer to tunneling between the degenerate states. Since the degenerate state are not defined the tunneling is not defined nor is the tunneling mechanism.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1, 3 - 5, 28, 29, 33, 34, 54, 56, 58 and 60 - 65 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tinkham in view of Char et al.

8. Tinkham shows a representative small system, i.e. mesoscopic, made up of a small superconducting island connected to charge reservoirs (page 248 top paragraph) and further, a small superconducting island connected to two macroscopic superconducting leads (page 256, last full paragraph). Tinkham does not detail the materials of the island, the leads or the JJs. Char et al. show the formation of grain boundary JJs of high temperature superconductor material (see cover Figures and column 2, line 3 et seq.) where an island 310 is connected to a body 312. It would have been obvious to use the Char et al. structure for the Tinkham device since it is known to be functional. With respect to claims 54, 56 and 58, the oppositely directed currents are inherent. With respect to claims 60 - 63, tunneling occurs in the SQUID and with respect to claims 64 and 65 it is known to use a field generator to effect the device.

9. With respect to claim 34, it would have been obvious to use a metal as a weak link since it is known in the art and would be a design alternative.

10. Claim 2, 30, 31 and 52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tinkham in view of Char et al. and further in view of Shnirman et al.

11. Tinkham and Char et al. show the basic device and Shnirman et al. show the use of a SET to read out a JJ q-bit (see Figure 1 and page 57, second column et seq.). It would have been obvious to modify the Char et al. device to include the SET to provide a readout for the Tinkham and Char et al. device. With respect to claim 52, the oppositely directed currents are inherent.

12. Claims 6 and 8 – 10, 35, 39, 40, 41, 53, 55, 57 and 59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tinkham in view of Char et al. and further in view of Baechtold et al.

13. Baechtold et al. show a binary circuit consisting of a series/parallel arrangement of JJs (see Figure 4 and column 5, line 57 et seq.). It would have been obvious to use the Tinkham and Char et al. structure in the Baechtold et al. device to provide the JJs. With respect to claim 53, 55, 57 and 59, the oppositely directed currents are inherent.

14. Claim 7, 11 and 12 – 18, 36, 37, 42, 43, 45, 46 and 48 - 50 in so far as they are understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Tinnkham et al. in view of Char et al., Baechtold et al. and further in view of Shnirman et al.

15. With respect to claims 7, 11, 36, 37 and 43 it would have been obvious to use the Shnirman et al. structure to provide a readout for the device.

16. With respect to claims 12 – 18, 42, 45, 46 and 48 - 50 it would be obvious to apply the structures described above in various combinations since the basic combination is shown.

17. Claims 32, 38, 44, 47 and 51 are rejected under the art shown above since it the devices are inherently parity keys.

Response to Arguments

1. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

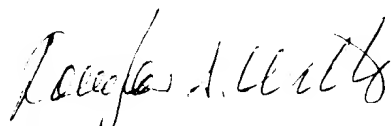

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas A Wille whose telephone number is (703) 308-4949. The examiner can normally be reached on M-F (6:15-3:45).

Art Unit: 2814

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Olik Chaudhuri can be reached on (703) 306-2794. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.

A handwritten signature in black ink, appearing to read "Douglas A. Wille".
